

# GoDesk

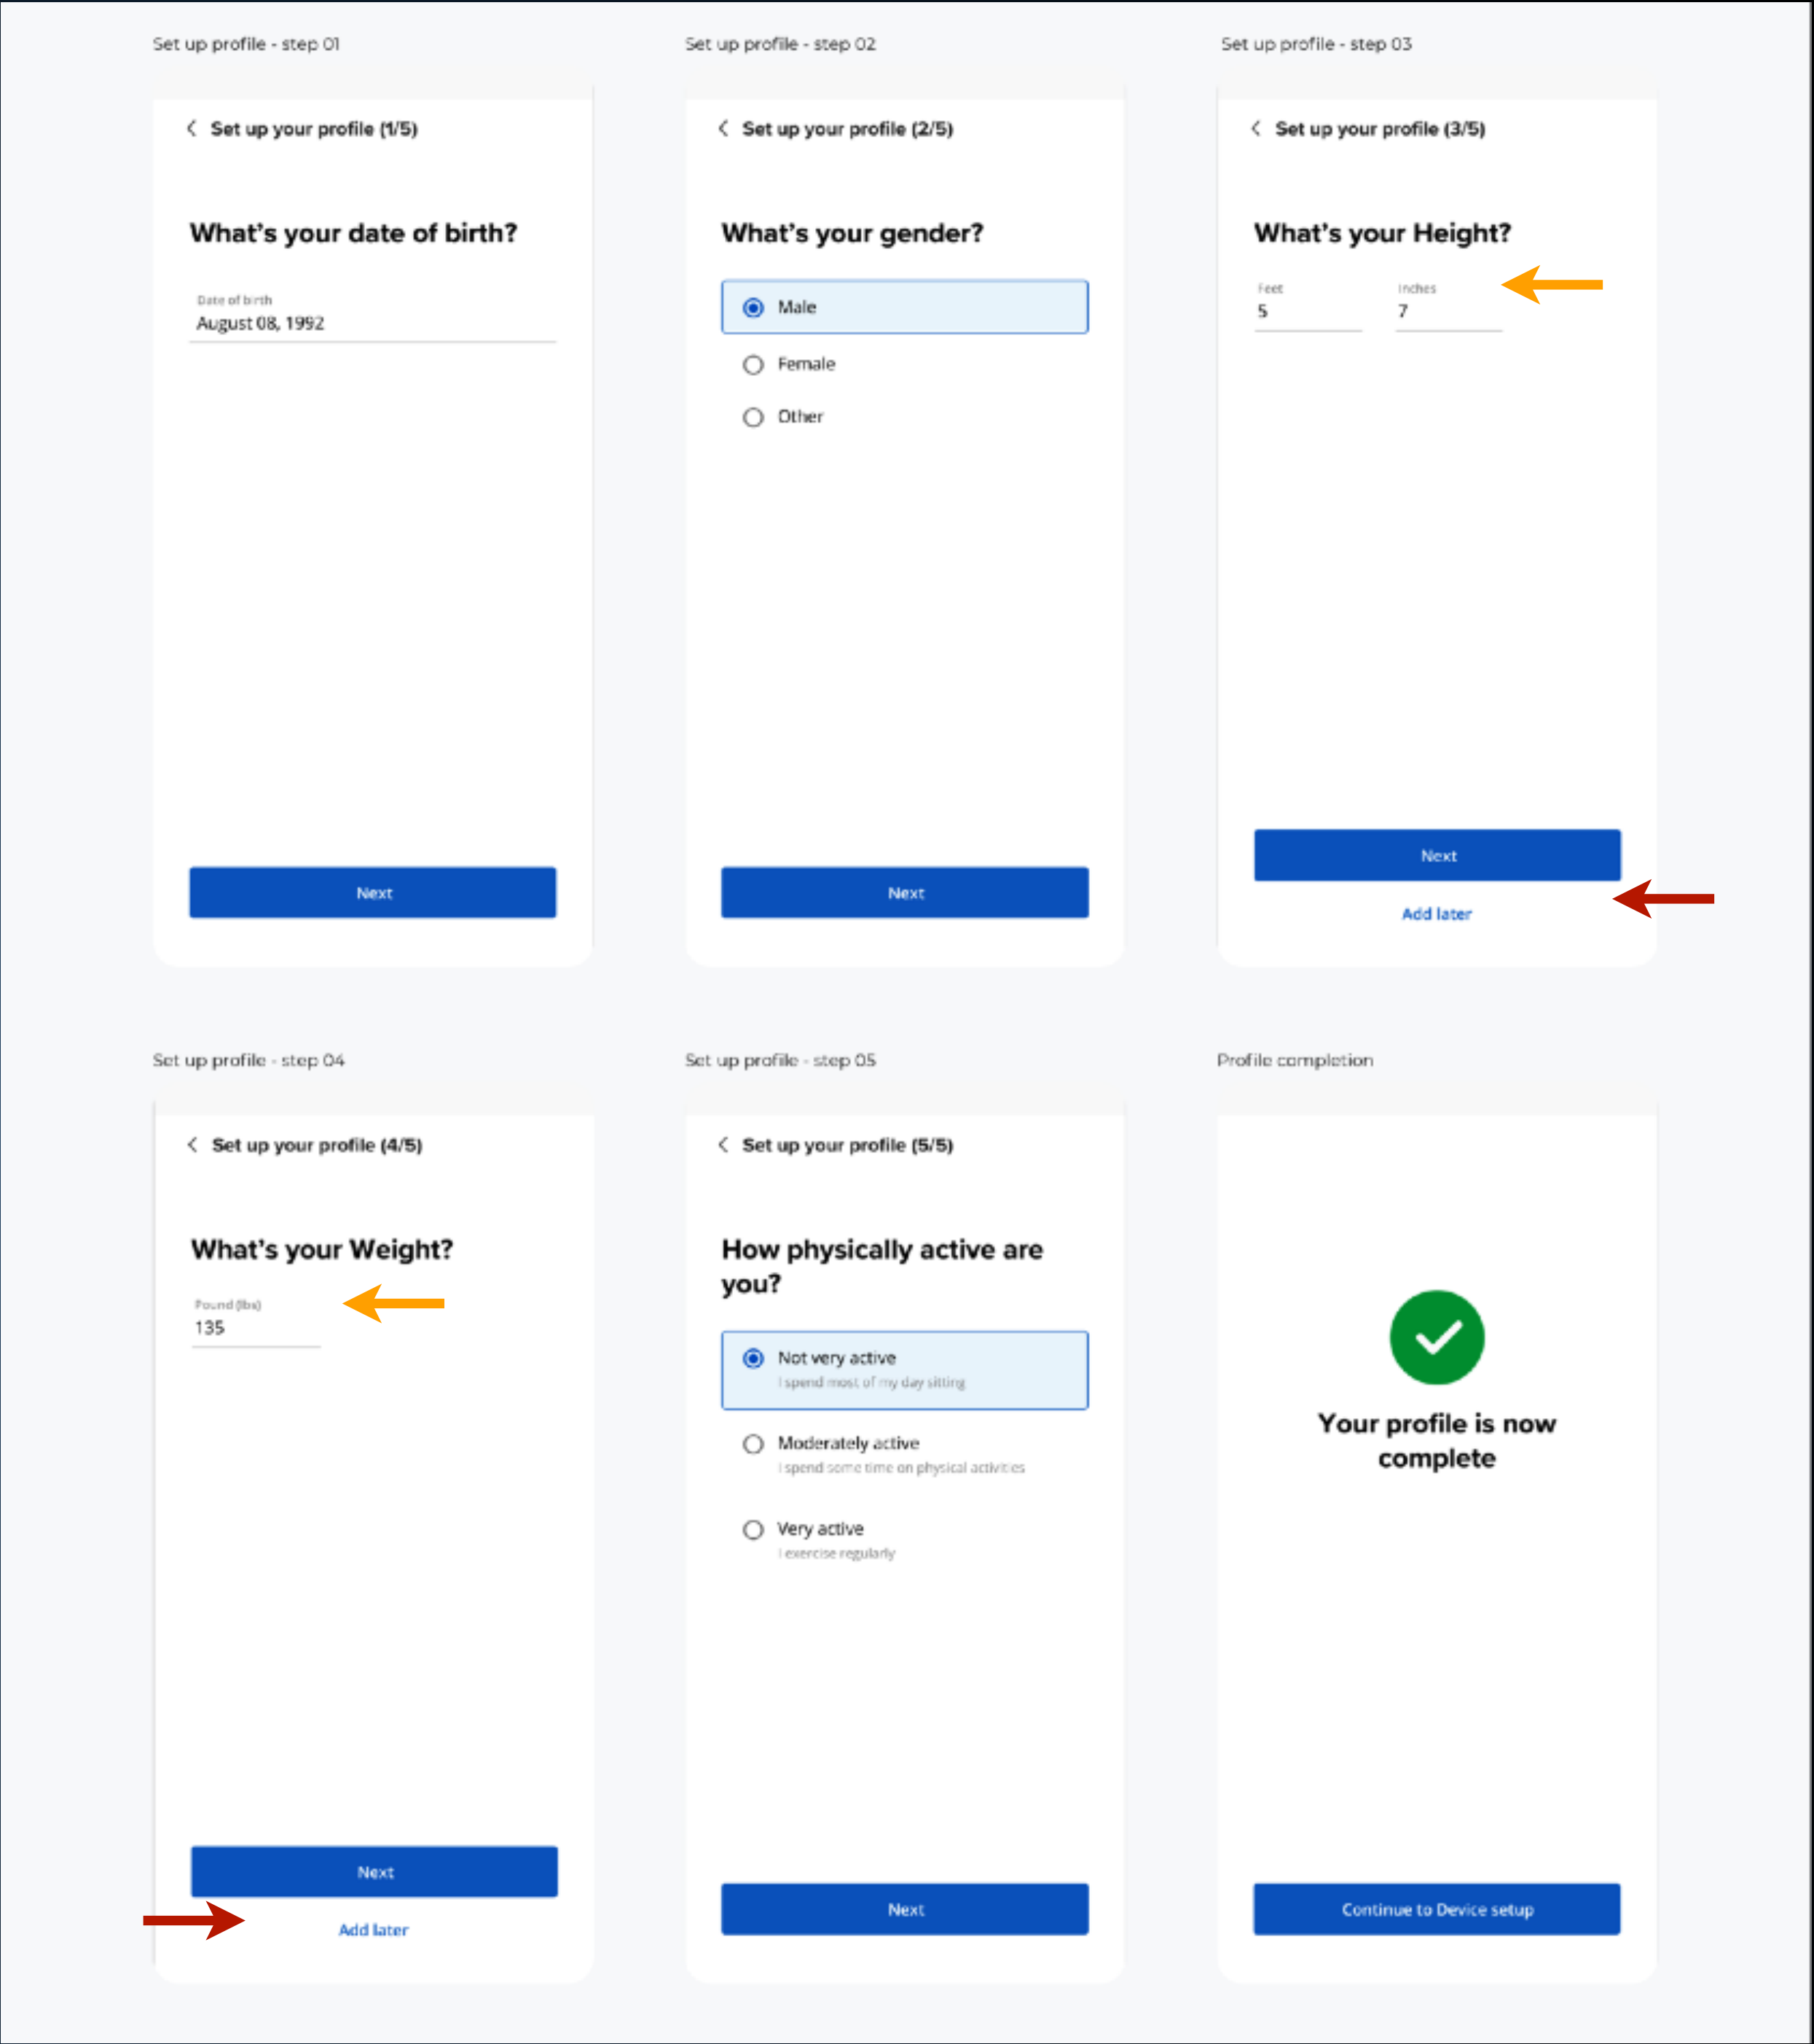

## Usability Testing

### Critical

When users explored onboarding flow, they had concerns about entering their personal information such as height, weight, etc.

### Serious

Users struggled to figure out the units of measurement for entering height and weight.

# GoDesk

## Take-Aways

- Importance of feature prioritization.
- Always incline to the best that satisfies the users needs.
- Lean UX process helps designers to focus more on the experience rather than the deliverables.

*“A successful product is never done or perfect.”*
